

It's up to you...

How you care for your shoreland impacts the entire lake or river system. These delicate, natural ecosystems are sustained through good environmental practices, therefore many activities in and around shoreland areas require permits or have specific guidelines to follow. Use the information in this pamphlet to find out when permits are required, and when, where, and how to get them. Also included are web addresses for many valuable online resources.

Know the rules

Shoreland is defined as all property within 1000 feet of a lake, pond, or flowage, or within 300 feet of a river or stream. The *shoreland protection area* is the vegetated strip of land 35 feet wide measured perpendicular from the ordinary high water mark (OHWM). Land use is regulated in all shoreland areas in Polk County and throughout its townships with comprehensive zoning. Permitted uses vary between villages and townships, and laws and restrictions may overlap.

Aquatic invasive species laws

Wisconsin Section 30.715, WI Act 16 prohibits launching a boat or placing a boat or trailer in navigable waters if it has aquatic plants or zebra mussels attached.

Polk County Ordinance 29-11 adopted in Spring, 2008, and amended in June, 2011 makes it illegal to launch a watercraft or be on a Polk County roadway with aquatic vegetation or invasive animals attached to auto, boat, trailer or equipment. Boaters must remove all aquatic plants and invasive animals before launching and before leaving the landing. Fines: \$200-\$500. For more information go to www.co.polk.wi.us/landwater.

Polk County Association of Lakes and Rivers (PCALR)
100 Polk County Plaza, #120
Balsam Lake, WI 54810

Published by Polk County Association of Lakes and Rivers (PCALR) in cooperation with Polk County Land and Water Resources Department and Polk County Zoning Department. PCALR's mission: To promote and preserve the natural, recreational, aesthetic, and ecological qualities of our lakes and rivers, to provide a forum for public expression, to contact and inform public officials of specific problems of our area, and to join forces, if necessary, to achieve a goal deemed crucial by the members to change political opinion and influence governmental bodies. Membership is \$10 per year for individuals, \$25 per year for organizations and groups.

For more information about PCALR go to www.pcalr.org.
To request copies of this pamphlet email president@pcalr.org.

Who's who...

Contacts for Your Waterfront Property Questions

Polk County, Wisconsin

Use this brochure to find the proper resources for your questions about waterfront property use, development, management, and restoration. Be sure your actions are legal and lake/river/stream friendly!

You need to know...

AQUATIC PLANT MANAGEMENT LAW: A permit is necessary for removal and harvesting of aquatic plants. Manual cutting and raking is allowed without a permit only if the area of plant removal is no more than 30 feet wide along the shoreline and any piers, lifts, rafts and other water use devices are located within that 30 feet. Wild rice may not be removed or destroyed in navigable waters without a permit. Manual removal of Eurasian water milfoil, curly leaf pondweed or purple loosestrife does not require a permit. Mechanical cutting/harvesting or chemical treatment of aquatic plants always requires a permit.* Cut and harvested plants must be removed from the water.

POLK COUNTY SHORELAND PROTECTION ZONING ORDINANCE: The Shoreland Protection Ordinance is available from Polk County Zoning or online at www.co.polk.wi.us.

Work to improve water quality

RESTORE YOUR SHORE. Maintain a strip of native trees, shrubs, wildflowers, grasses and sedges 35 ft. wide back from the ordinary high water mark. Shoreland buffers help protect our lakes, rivers and streams from nutrients, pollutants and sediments in runoff from the land. Deep-rooted native plants can limit erosion while offering a place for wildlife.

DON'T USE PRODUCTS CONTAINING PHOSPHORUS. If you use fertilizer, the middle number in the formula on the package must be zero. Also, choose phosphorus-free soaps for laundry, dish washing and household cleaning.

VERIFY YOUR SEPTIC SYSTEM IS WORKING PROPERLY. Septics can directly affect surface and ground water. Bacteria as well as nutrients can enter the water from improperly functioning septic systems.

THINK ABOUT YOUR ROLE AS A SHORELAND OWNER. The way you manage your property affects the entire lake ecosystem. Polk County Association of Lakes and Rivers (PCALR) can direct you to more resources for protecting and restoring your waterfront property.

*NR107 and NR109. See Aquatic Plant Management Law in Online Resources at the right.
